DETAILED ACTION

This is an Allowance for Application no. 10/085,616 in response to the After Final Amendment filed on February 20, 2007.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the prior art of record since the cited references taken individually or in combination fail to particularly disclose a method or apparatus for coding wherein the coding is based on the identifying a feature by defining at least one training feature vector and its cost relating to a unit of the first portion of video data and defining a training feature space containing the feature vector.

The closest prior art ('A Self-Governing Rate Buffer Control Strategy for Pseudoconstant Bit Rate Video Coding' by Chen et al.) discloses a similar method and system of mode decision making. However, Chen fails to particularly teach or suggest "wherein identifying the at least one feature includes: defining at least one training feature vector and its cost relating to a unit of the first portion of video data and defining a training feature space containing the feature vector". Chen further does not teach the probabilistic model based on the above feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick Rekstad whose telephone number is 571-272-7338. The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on 571-272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
